

EIT Climate-KIC, Europe's leading climate innovation agency, are pleased to invite you to:

Enabling transformation to achieve 1.5C, sustainable development, and adaptation

**6th December, 17:15 – 18:30
in Vienna Room, EU Pavilion**

The session will focus on transformative adaptation, international law, and risk information- making the case for integration of SDG 13 (climate action) and the Sendai Framework - highlighting co-benefits and opportunities in finance, regulation, and innovation.

We will: elaborate on climate-resilience pathways and transformation with perspectives from Europe and India; focus on both enabling and challenging international law and policy; and lastly, discuss the opportunity of climate risk data and information - to assess sustainable options, inform decision-making and enable finance to implement mitigation and adaptation actions.

Speakers:

Reinhard Mechler, IIASA

Ashish Chaturvedi, GIZ India

Paolo Davide Farah, Global Law Initiatives for Sustainable Development (UK) and University Professor at West Virginia University (USA).

Julie Calkins, Head of Risk Information for Climate Adaptation (EIT Climate-KIC)
