

Vision and mission

The CCCA is the network of Austrian climate research.

The CCCA understands "climate research" to mean the scientific examination of climate change, its systemic causes, the consequences of climate change for society, the economy and the environment, strategies for climate protection (mitigation) and adaptation to climate change (adaptation).

The CCCA supports its members in achieving their research goals and bases its activities on the original research of its members.

The CCCA sees it as its social responsibility to make and communicate scientifically sound contributions to overcoming the challenge of climate change.

The CCCA sees itself as the point of contact for all questions relating to the physical and social basis of climate change, adaptation and climate protection measures.

Vision of the CCCA: **Climate research for a sustainable future**

To achieve this vision, the CCCA pursues the following **missions**:

- Support and networking of climate researchers in Austria (community building)
- Support and networking for national and international research activities
- Supporting the transfer of knowledge within the network and to the outside world
- Promotion of interdisciplinary and transdisciplinary discourses on climate research
- Promotion of young scientists
- Establishment and support of working groups on specific issues
- Organization and implementation of scientific conferences, workshops and dialogue events
- Preparation of status reports and other publications on climate change
- Supporting members in the transformation in line with the UN 2030 Agenda for Sustainable Development, for example by sharing information and experience
- Scientific advice for political and economic decision-makers
