

Lessons learned

- Some sectors "stakeholder fatigue" (agriculture)
- ? How to deal with conservative groups (chamber of agriculture)
- Not open to co-creation process
- possible solution: Ω Rochade
- you need a team of researcher & facilitator
- How to evaluate impact of research projects (long term)

- ? from qualitative approaches to quantitative methods
 - "upscaling", added value
 - ↳ development of open source handbooks (f.ex. f. role plays) ABM (agent based modelling) = flexible
- documentation in research projects of "non results".
- what is the role/responsibility of researchers (f.ex. of "teaming" choice of methods/models...)
- "meta-stakeholder" (speaking for groups)

Purpose

- Clarity
- Transparency
- Fitting the purpose
- Output $\Rightarrow$ Action based?

Involvement/Duration

- Who? When? How?

Output

- Processing the results

Questions

How to ensure legitimacy?

How to validate results?

How to find the right method?

Communication

How to communicate that there exists an added-value for stakeholders?
Horne

How can you best present your results to the stakeholders?
Coudine

Methods

How to structure and organize scientific-policy interaction?
Luvens

What are the possible strategies to upscale participatory methods? or use them in a selection of methods?
Luvens

How to GENERATE TEST SYNERGIES BETWEEN METHODOLOGIES?
ANINA

Research design
+ How to do that

Which participatory methods can best deal with mixed interests from various stakeholders?
Luvens

HOW TO SELECT THE STAKEHOLDERS + HOW TO ESTABLISH ACCESS/CONTACT?
Luvens

What is the ideal research approach for participatory approaches?
Luvens

What are the problems, solutions, limitations + methods in public participation in risk governance?
Luvens

OUTPUT

How to ensure that the output of a participatory process leads to behavioural change (if that was the goal)?
Luvens

How to evaluate the effectiveness of participatory research?
Thomas

How can stakeholders participate in improving the effectiveness of certain projects?
Muller
