

Round Table Clim:Law: International Climate and Energy Law and Energy Policy - a Critical Approach from a Cuban Perspective

Organised by the Research Centre for Climate Law (ClimLaw: Graz)

Thursday, 7 May 2026

12:15-13:45

SR 15.34 RESOWI Part D, 3rd Floor
Universitätsstraße 15, University of Graz, 8010, Graz

Univ.-Prof. Elizabeth Valdes-Miranda Fernandez

Elizabeth Valdés-Miranda Fernández is a Professor of International Public Law, Faculty of Law, University of Havana. She was also Political Counsellor for the Deputy Chief of Mission at the Cuban Embassy in Japan.

Content:

The presentation will examine how international climate and energy law operates within a structurally unequal global system, highlighting the gap between formal legal obligations and the material capacity of states to implement them, using the Cuban case as an illustrative example. It will discuss the global energy transition, which is legally structured but practically uneven, shaped by financing, technology, and institutional constraints.

To register to attend the event:
